Professional Summary

Software Development-focused final-year Electronics and Computer Engineering student with a 9.26 CGPA and strong foundations in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks & MySQL. Experienced in using Python & SQL in various projects. Solved 150+ DSA problems on LeetCode and passionate about building scalable software solutions.

Education

Thapar Institute of Engineering and Technology

B.E. in Electronics and Computer Engineering — CGPA: 9.26/10

2023 – 2027

Patiala, Punjab

Technical Skills

- **Languages:** Python, SQL, C, C++
- **Web Development:** HTML, CSS, JavaScript (Basic), FastAPI (REST APIs)
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
- **Other Tools & Tech:** Figma, GitHub, VS Code, MySQL

Work Experience

PredictRAM – Finance Analytics Firm

Research Associate – Financial Analyst Department

Jan 2026 – Apr 2026

Remote, India

- Prepared investment-grade equity research reports covering the Indian Chemicals & Petrochemicals, Media and Mining sectors.
- Performed financial modeling, company valuation (P/E, EV/EBITDA), and comparative analysis to support investment recommendations.
- Conducted industry research, validated business hypotheses and translated financial data into concise, actionable investment insights.

Bluestock Fintech

Data Analytics Intern

June 2026 – Present

Remote, India

- Analyzed large-scale business datasets using SQL and Python to identify trends, patterns, and actionable insights for data-driven decision-making.
- Performed data preprocessing, data cleaning, transformation and exploratory data analysis (EDA) using Pandas, NumPy, and Microsoft Excel to improve data quality and consistency.
- Designed interactive Power BI dashboards to monitor key business KPIs enabling efficient reporting and performance tracking.

OWASP Student Chapter, TIET

Executive Board Member

Nov 2023 – Present

Patiala, Punjab

- Served as Marketing Head and UI/UX Lead for HackOWASP 6.0, improving participant engagement through intuitive design workflows and promotional campaigns.
- Led marketing initiatives for flagship events, reaching an audience of over **1,000+** participants across multiple platforms.
- Collaborated with technical teams to organize cybersecurity workshops and technical events for more than **200+** students.

Projects

Dropbox Clone | *Python, FastAPI, SQL, CN(HTTP), DBMS*

July 2026

- Developed a Dropbox-inspired file storage and sharing application using FastAPI, RESTful APIs, CN, SQL and DBMS principles.
- Designed relational database schemas and implemented CRUD operations for efficient file metadata management and user interactions.
- Integrated frontend and backend using HTTP-based client-server communication, enabling secure file upload, download, and management through REST APIs.

GreenSync – Smart Self-Watering Pots | *ESP32, HTML, CSS, JavaScript, IoT*

Jan 2026 – Present

- Developing an IoT-enabled smart irrigation system integrating ESP32 with environmental sensors for automated plant watering.
- Designed a responsive web dashboard for real-time monitoring and remote scheduling of watering operations.
- Integrated sensor communication and control logic to improve irrigation efficiency by approximately **40%**.

GDP Growth Prediction using Machine Learning | *Python, Pandas, NumPy, Scikit-learn*

Apr 2025

- Collected and preprocessed World Bank macroeconomic datasets using Python and Pandas.
- Built Linear Regression and Random Forest models to forecast GDP growth, achieving an **R² score of 0.92**.
- Evaluated model performance and visualized prediction results using Matplotlib and feature analysis.

Strava Fitness Data Analysis | *Python, SQL, Power BI*

Aug 2025

- Developed SQL pipelines for cleaning and transforming fitness datasets from 33 users across 18 CSV files.
- Performed exploratory data analysis using Python to identify activity patterns and user trends.
- Built an interactive Power BI dashboard for visualizing weekly performance metrics and fitness insights.

E-commerce Sales Analysis | *Python, SQL, Pandas, Numpy*

Dec 2025

- Analyzed customer, seller, and transaction datasets using SQL and Python to identify revenue trends.
- Implemented complex SQL queries using joins, subqueries, CTEs, and window functions.
- Automated data querying and reporting workflows through Python integration with SQL databases.

Achievements & Certifications

- **Data Structures & Algorithms:** Solved **150+** coding problems on LeetCode covering arrays, strings, linked lists, trees, graphs, dynamic programming, and greedy algorithms.
- **HackerRank Certifications:** Earned verified certifications in **Python** and **SQL**.
- **Cisco Networking Academy:** Successfully completed the Cisco Network Technician Career Path certification.
- **Google Prompting Essentials:** Completed Google's official Prompting Essentials program, including "*Speed up Data Analysis & Presentation Building*" and "*Use AI as an Expert Partner*".
- **Deloitte Technology Job Simulation:** Completed Deloitte Data Analytics Job Simulation (Forage), applying SQL, data analysis, and business problem-solving skills.
